CABLE GLAND SATI BLOCK

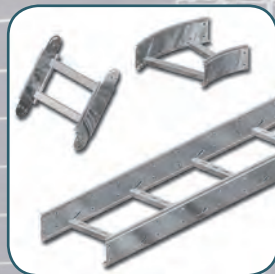

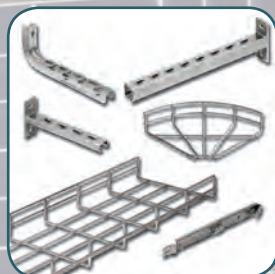

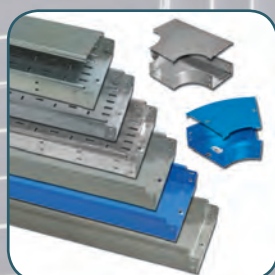

WWW.SATITUNISIA.COM

Sati Tunisia

La longue expérience du Groupe Carpaneto Sati dans le secteur électrique et sa stratégie d'internationalisation ont rendu possible, en 2006, la constitution d'une nouvelle réalité manufacturière en Tunisie. Le but de SATI TUNISIA est de satisfaire les demandes du marché de l'Afrique du Nord, tournées aux systèmes de chemins de câbles et les passerelles en métal dans les versions sendzimir, galvanisé à chaud par immersion, laqué, et en acier Inox. Bref un savoir faire du produit dérivant de la longue expérience de la marque italienne Sati Italia S.p.A, propriétaire du système de chemins de câbles à encastrement S5.

Parmi les caractéristiques les plus importantes du système de chemins de câbles et des passerelles métalliques, qui en ont fait un "best seller" du marché italien, nous comptons la rapidité et la facilité d'installation grâce aux solutions spéciales de jonctions, la disponibilité d'une vaste gamme d'accessoires et le considérable performance et durée. Résultats obtenus par utilisation de matériels de haute qualité et au moyen des applications technologiques les plus récentes dans les procès de fabrication. A travers SATI TUNISIA, le Groupe Carpaneto Sati entend offrir au marché tunisien des installations électriques de même niveau

qualitatif du produit, de choix et de service qui en a fait un leader du marché en Italie.

Dans le cadre de la croissance de ses activités et infrastructures, la société SATI TUNISIA s'est implantée, depuis 2013, sur son nouveau siège, photo ci-haut, size à la Z.I. à la Meghira, d'une superficie d'environ 5000 mq.

Les lignes de produits actuellement traitées sont:

- Système de canalisation et passerelles en métal à encastrement "Ligne S5".
- Système de passerelles en métal à échelles "Ligne S3".
- Système de passerelle métallique à fil "Ligne S2".
- Système de gaines enroulés et raccords rotante.
- Systèmes de structures modulaires "Ligne Sati Speed"
- Installations de terre et paratonnere, Equipotentiels.
- Canalisation électriques préfabriquées de 25A à 1000A.

PRESSACAVI IN OTTONE NICHELATO CABLE GLANDS BRASS NICHEL PLATED

Guida alla scelta linea sati block / Guide for choosing the sati block line

Ottone nichelato.
Senza alogeni.
Temperatura di impiego da - 30° C a + 80° C.

Brass, nickel plated.
Halogen free.
Permanent operational time - 30° C - to + 80° C.

Testata di chiusura resistente ad alte temperature e compressioni.

Head piece that resistance to high temperature and compression.

Sistema di serraggio che evita gli allentamenti causati dalle vibrazioni.

Lock system that prevent slackening in vibrational areas.

Struttura lamellare che distribuisce la forza di serraggio a 360°.

360° equal clamping range in every point.

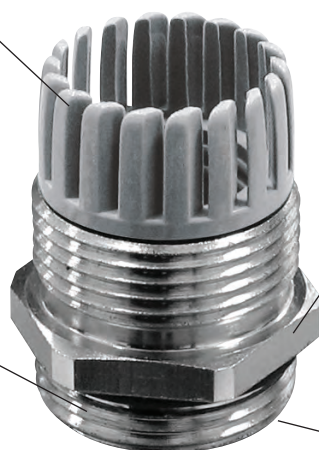

Guarnizione in TPV.
IP 68.
UV.

TPV rubber seal.
IP 68.
UV.

Filettatura AG secondo norme:
PG DIN 40430 / Metrico EN 60423.

AG thread that is acceptable norm:
PG DIN 40430 / Metric EN 60423.

Corpo resistente ad alte temperature e compressioni.

Body part that resistance to high temperature and compression.

Parte liscia terminale che evita il danneggiamento dei cavi.

There is a slickness ground that prevent cable's hung on.

Controdado in ottone nichelato per alte resistenze a temperature e compressioni.

Brass, nickel plated lock nut that resistance to high temperature and compression.

Superficie ruvida per evitare lo scivolamento.

Roughing surface that prevent gliding.
